PROFESSIONAL SUMMARY

Computer Science student at Future University in Egypt (Expected Graduation: 2026) specializing in Full-Stack Development, Backend Engineering, and Security-Focused Software Engineering. Experienced in building scalable enterprise applications using React, Next.js, Node.js, TypeScript, NestJS, MongoDB, PostgreSQL, and Electron. Strong background in REST APIs, Zero-Trust security models, authentication systems, performance optimization, and responsive UI/UX design.

TECHNICAL SKILLS

Technical Tools: JavaScript, TypeScript, React.js, Next.js 14, Node.js, NestJS, Electron.js, Tailwind CSS, MongoDB, PostgreSQL, Supabase, Git & GitHub, Postman, Linux, PowerShell

Engineering: REST APIs, Zero-Trust Architecture, JWT Authentication, WireGuard, Performance Optimization, Responsive UI/UX Design, Agile Development

Soft Skills: Problem-Solving, Collaboration, Communication

PROJECTS

Corpo VPN – Zero-Trust Enterprise Security Suite

- Engineered an enterprise-grade desktop VPN client using Electron.js and React implementing a Zero-Trust security model with automated endpoint compliance validation.
- Architected automated WireGuard provisioning workflows using NestJS and custom Linux VPS agents to manage peer generation, IP allocation, and routing configuration.
- Configured Linux firewall routing and iptables NAT forwarding to maintain resilient, secure, and low-latency VPN tunnels.
- Implemented real-time diagnostics and throughput monitoring using Electron IPC communication for enhanced observability.
- Integrated passwordless JWT-based authentication workflows with Supabase and Brevo Email API to streamline enterprise onboarding.
- Tech Stack: Electron.js, React 18, Vite, Tailwind CSS, NestJS, PostgreSQL, Supabase, WireGuard, PowerShell, Ubuntu Linux

Smart Cart – Premium E-Commerce Platform

- Architected a high-performance e-commerce storefront using Next.js 14 (App Router) and TypeScript with Server-Side Rendering (SSR).
- Implemented parallel API calls using Promise.all to optimize data fetching and improve application responsiveness.
- Developed global cart and wishlist state management using React Context API.
- Built a responsive UI with category sliders, product cards, and interactive hover animations.

Yummy – Interactive Culinary Directory

- Developed a dynamic culinary directory using JavaScript, jQuery, Bootstrap 5, and REST API integration.
- Built advanced filtering and search capabilities for recipes by category, ingredient, and region.
- Implemented custom client-side validation using RegEx for secure user form validation.
- Created interactive UI animations, asynchronous loading transitions, and dynamic DOM-rendering utilities.

Hospital Management Backend System

- Developed a scalable Node.js and MongoDB backend with role-based authentication for patients, doctors, and administrators.
- Implemented JWT authentication, bcrypt password hashing, and modular API architecture for secure backend operations.

EXPERIENCE

Student Intern A/ITB

07/2025 – 08/2025

- Worked on backend development tasks and API integration projects.
- Collaborated with development teams using Agile workflows and Git version control.

Student Intern Egyptian Airports Company

07/2024

- Supported networking and software development operations in enterprise-scale IT environments.
- Assisted with infrastructure troubleshooting, software maintenance, and security-related operations.

EDUCATION

Bachelor of Computer Science *Future University in Egypt*

Expected: 2026

- Specializing in Full-Stack Development, Backend Engineering, and Security-Focused Software Engineering.

CERTIFICATIONS

Red Hat System Administration I (RH124) *Red Hat*

Python Programming with Red Hat (AD141) *Red Hat*

AITB Back End Training *AITB*
